Subject: novel influenza (swine-origin influenza A/H1N1) Information

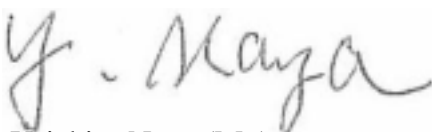

Dear Colleagues:

JPCA Show 2009 (39 International Electronic Circuits Exhibition), 2009 Microelectronics Show (23rd Advanced Electronics Packaging Exhibition) and JISSO PROTEC 2009 (11th Jisso Process Technology Exhibition), will be held in June 3 to 5 as originally scheduled. We are now monitoring very closely developments associated with novel influenza (swine-origin influenza A/H1N1), and making our efforts to collect up-to-dated information on the novel influenza. We, JPCA, as the three exhibitions organizing managing association, endeavor to provide the safe and healthy environment for both participants and exhibitors at the JPCA Show 2009, 2009 Microelectronics Show, and JISSO PROTEC 2009.

The Japanese Government, together with related organizations, including local governments and medical facilities, has already taken urgent and effective measures to prevent the pandemic of the disease in Japan.

We JPCA will continue to monitor the situation and update our website when necessary. We will be most grateful for your kind cooperation. Thank you.

With best regards,

Yuichiro Naya (Mr.)
Chairman, Exhibitions Organizing Steering Committee
Vice-Chairman of JPCA – Japan Electronics Packaging and Circuits Association
