Comments from 2022 exhibitors on reasons for exhibiting and results

Comments from exhibitors (excerpt from the exhibitor's questionnaire)

The results (of exhibiting) were of higher quality than other exhibitions. We were able to hold deep discussions with visitors.

There were many visitors that are in our target range making it a very fulfilling exhibition.

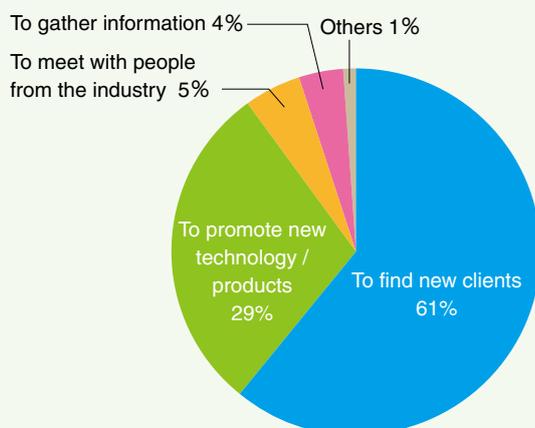

The number of visitors to our booth was larger than we expected. We appreciated the addition of being able to acquire new leads from the online explanation of products.

Due to the COVID-19 pandemic, it was the first time we exhibited in three years, so we were quite anxious. However, it was a bigger turn-out than we had expected and made us realize the importance of in-person events. It was good to exhibit regardless of our anxieties.

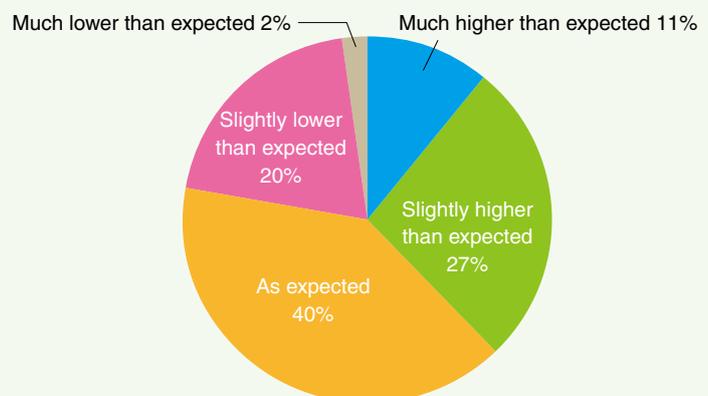

It seemed that the visitors all had concrete purposes to visit.

In order for small and medium size companies from non-major cities to meet with new clients, in-person exhibitions held in the Tokyo area are a necessity, so we hope that the exhibition will continue to be held in the future.
